

200,000

**businesses close every year
in Vietnam**

Most didn't fail because of bad products.

THE PROBLEM

Most F&B entrepreneurs **don't know** if their model works

They sign leases, invest savings, and open doors — without knowing when they'll break even, which costs are too high, or if the numbers make sense at all.

8 years ago, I walked into F&B with nothing but passion and 'it'll be fine.' I wish someone had shown me the numbers.
